

TriStar® VS

»»» Variable-Speed Pumps

SP3202VSP

With industry-leading hydraulics and a super-efficient permanent magnet motor, Hayward's TriStar® VS residential pool pumps are the most energy-efficient pumps on the market, according to EPA ENERGY STAR® third-party testing.

INDUSTRY-LEADING ENERGY EFFICIENCY

With its advanced hydraulic design, integrated variable-speed control and permanent magnet motor, the TriStar VS creates the right flow at the right time, saving up to 90% per year on energy costs. Its ENERGY STAR® rating means owners may be eligible for local energy rebates.

RIGHT-SIZED FOR SAVINGS

Because it operates efficiently at lower horsepower, TriStar VS is the ideal upgrade for most high-performance pumps up to 1.5 HP full rate or 2 HP up rate, paying for itself faster than larger, more expensive VS models.

EASY INSTALLATION & MAINTENANCE

2" x 2½" CPVC union connections make installing and servicing TriStar VS pumps simple. Two pump-base options allow for seamless retrofitting anywhere, and an extra-large, no-rib debris basket means you'll never have to worry about a mess.
